In this letter:

- Progress update
- Community project
- Website

Dear Residents,

This is our fourth resident newsletter which will give you an overview of the construction progress at Beatrice Tate School.

Structural works are currently on going. The concrete slab at ground floor level was poured last month and masonry has followed to reach the first floor.

As you may have seen, three steel structures are currently being erected to create high spaces to the pool, the gym and the entrance hub.

In the coming weeks we will be commencing the works of the external building located adjacent to the boundary wall of Hamlets Way.

Our website will provide you with more information about our work at Beatrice Tate School: <http://www.bouygues-projects.co.uk/tower-hamlets-bsf>

Also, we are keen to know more about local community projects and how we may be able to assist. If you have something in mind, please do not hesitate to contact us.

Bouygues UK would like to thank you for your support during the building works at Beatrice Tate School. If you would like to talk to us about anything relating to this project, please contact us through our 24-hour helpline number on:
